This figure shows a breakdown of users that use iCER support services. These support services include support tickets, iCER workshops and office hours.

**List of iCER workshops in October:**
- Introduction to Linux/Unix
- Introduction to HPCC
- Parallel Computing with MATLAB
- What's New with MATLAB

### RESEARCHERS USED iCER SERVICES

- **Compute 84%**
- **Support 37%**

### PERCENTAGE OF BUY-IN ON LACONIA 2018 BUY-IN

- **825**
- **71%**

### NUMBER OF USERS USING iCER COMPUTE SERVICES IN OCTOBER

- **Developer/Login Nodes**
- **Batch Queue**
- **Mapped Home Drive/Samba**

- **215**
- **222**
- **145**

**NUMBER OF USERS USING iCER COMPUTE SERVICES IN OCTOBER**

This figure shows a breakdown of users that use iCER compute services:

- **241 users (222+19)** use the developer nodes to submit jobs to the queue.
- **162 interactive users (145+17)** only use iCER developer nodes to do their work. This includes users:
  - Only need access to software (ex. Matlab, mathematica)
  - Still in software development process and have not submitted a job
  - Find development nodes are sufficient for their research.
- **55 users** only used the iCER file systems to store their files.
- **217 researchers (145+17+55)** used iCER hardware outside of the batch queue.

### NUMBER OF USERS USING iCER SUPPORT SERVICES IN OCTOBER

- **Tickets**
- **Workshops**
- **Office Hour**

- **225**
- **52**
- **10**

This figure shows a breakdown of users that use iCER support services. These support services include support tickets, iCER workshops and office hours.
COMPARISON BETWEEN NUMBER OF USERS USING ICER SUPPORT AND COMPUTE SERVICE IN OCTOBER

132

DAILY SCHEDULER ACTIVITY IN OCTOBER

On a typical day, the scheduler processes approximately 3,480,543 jobs. This includes jobs that are queued, jobs that start and jobs that end. Put in another way, the scheduler manages approximately 86 jobs per minute.
TICKET ACTIVITY SUMMARY IN OCTOBER

- Tickets Created: 278
- Tickets Updated: 406
- Tickets Resolved: 292
- Open Tickets: 19

TICKET MESSAGE SUMMARY IN OCTOBER

- Total Users’ Messages: 566
- Total iCER’s Messages: 802

TICKET RESOLUTION STATISTIC IN OCTOBER

- Messages answered within 5 hours: 486 (48%)
- Messages answered within 5-12 hours: 12%
- Messages answered within 12 hours - 24 hours: 27%
- Messages answered within 24 hours - 2 day: 8%
- Messages answered in more than 2 days: 5%

HOW TO CHANGE PERMISSION ON SHARED RESEARCH SPACE

84 New User Accounts are created in OCTOBER
In an effort to better serve our users, we have been analyzing the software that is being used on the HPC by recording which software modules are being loaded using the “module load” command. Clearly this is not a complete view; many users install their own software in their home directories, some modules are automatically loaded as part of a user profile and there will be a bias toward pleasantly parallel codes which will load their required modules every time a job runs (as compared to bigger jobs which would only load the modules once). However, we find this data interesting and wanted to share it with you.

The pie chart shows the most commonly loaded modules. Note again that the biggest ones are the ones included in a user’s default profile such as MATLAB, Python, and R. These modules get loaded every time they log in or run a job. As can be seen clearly, the default modules get loaded in an order of magnitude more than many of the other modules.

After taking out the default modules, the pie chart on the right shows more modules that users are choosing to include in their .bashrc files and being submitted on a lot of jobs.
