This figure shows a breakdown of users who accessed ICER compute services:

- **50 users accessed the developer nodes to submit jobs to the queue.**

- **798 interactive users utilized only ICER developer nodes to do their work.** This includes users who:
  - Only need access to software (ex. Matlab, mathematica)
  - Are still in the software development process and have not submitted a job
  - Find development nodes sufficient for their research.
On a typical day, the scheduler processes approximately 101,250 jobs. This includes jobs that are queued, jobs that start, and jobs that end. Put in another way, the scheduler manages approximately 70 jobs per minute.
